

PLEDGE FORM

RESILIENCE FIRST

Resilience First is offering our business members the unique opportunity to become recognised leading players in contributing to a better, safer world, through partnership of the UNFCCC's Race to Resilience Campaign.

Partnership of the campaign which aims to build global resilient communities includes pledging to certain commitments which would minimise businesses' risk whilst evolving their climate resilience plans.

Businesses are required to commit to pledges 1 and 2, and at least two of the other obligations. Please indicate your two additional pledges below.

1.	Use a Resilience Self-Assessment Tool (which may be supplied by Resilience First) to measure their resilience and track resilience improvements.	<input checked="" type="checkbox"/>
2.	Appoint a 'climate advocate' and/or 'resilience advocate' within their organisation who will champion resilience and sustainability standards and initiatives internally and/or demonstrate their commitments to one or more of the UN's 2030 SDGs as well as share their good work across the Resilience First network.	<input checked="" type="checkbox"/>
3.	Mentor an SME headquartered in the Global South to join the network.	
4.	Co-create innovative climate resilient solutions (subject to additional funding).	
5.	Proactively share your business' resilience best practice within the Resilience First network through contributions to our Resilience Knowledge Hub (online library of resources) and Thought Leadership articles to our network's monthly newsletter. As well as attend at least three webinars/ events annually and speak at our events/webinars when invited.	
6.	Commit to the programme to drive action by 2030.	

In addition to the pledges, members in the network will be required to undertake and report results of an annual resilience survey, which will address issues around the following key areas relevant to the Race to Resilience:

Plan

The sharing of a specific climate resilience plan for the business and or community they operate in.

Proceed

The timeframe for the implementation of the plan.

Publish

To share any outcomes from the plan, including the total number of people impacted by the plan (to include total number of employees, suppliers and end-users or consumers).

By signing below, you commit to the above indicated pledges as well as the measuring of progress for these pledges and other areas related to resilience as outlined above.
